Being healthy goes beyond physical exercise and eating right. Emotional wellness, strong personal relationships, and positive attitudes are important building blocks of health that need to be maintained. Yet, at times, we may feel unable to resolve all the decisions, personal problems, family issues or career difficulties we face. In such times, it's a relief to have someplace to turn.

The Employee Assistance Program (EAP) from APS Healthcare fills this need. This program provides professional support services designed to help people cope with a variety of personal and career-related issues. EAP services are easily accessible, confidential and available 24 hours a day at no out-of-pocket cost.

The goal of our EAP is to help people lead healthier lives.
